### Just imagine having to explain in three years why you didn't.

It's a known fact. You get what you pay for. In some cases, a Lancer-made glassware washing system may cost a bit more than the competition. Often times, not. But whenever you specify a Lancer UP Series glassware washer, you know you're getting a quality-built instrument that is designed to last.

- From under-the-counter to large production chambers, Lancer's 42 different models offer sizes to meet all applications
- Multi-level, vertical loading accommodates more glassware in a smaller area
- More than 50 standard racks for varying load sizes
- 304L frame, interior and exterior ensures unparalleled years of use
- Industrial microprocessor with self diagnostic software
- Built-in chemical pumps for detergent and acid ensure accuracy in dosing

### Which LANCER glassware washer is right for you?

With Lancer's full line of glassware washers, we're sure to have an instrument that meets your unique cleaning needs. To determine which Lancer model is best for you, please complete and mail the attached questionnaire or call us at 407-327-8488. Just for responding, you'll be eligible for a free on-site analysis of your cleaning applications. It's our way of saying thank you for considering the LANCER glassware washing system.

Lancer...  
when quality counts.

**Raise the bar.**

In a world where good enough has become the standard, LANCER washers are exceeding expectations. While some may boast of a handful of special gadgets or features, we offer a washer that in every aspect of its design, construction and function out-distances the competition.

- 316L stainless steel on the interior and exterior of our machines
- A clutter-free chamber design for maximum draining and drying
  - A full one-inch radius on all corners
- Customized rack options to meet your specific load requirements
  - Custom chamber configurations
  - Multi-level options to maximize chamber volume
- Unique programming options allow you to control building water supply, HVAC exhaust, drain and pH neutralization effluent
- Control package options that include LANCER'S own quality microprocessor or PLC controllers by Allen Bradley and Siemens
  - Customized monitoring packages available
  - Data port connections allow for data collection and specific reporting requirements
  - 21 CFR Part 11 and GAMP compatible
  - The most complete documentation package in the industry standard!

**LANCER...reaching higher**
